Cosmic Creation, Unity Consciousness, & New Life in the Quantum Field

We are bathed in quantum fields of energy and information from stars, galaxies, and multiverses of cosmic creation. Their impact on our physical bodies, as well as on our psychological and spiritual beings, is tremendous and challenging. A complex integration process of multidimensional awareness is necessary for unity consciousness to be experienced as a new earthly reality. With the help of these invisible quantum fields, we may enjoy paradise on earth as we ascend in unity consciousness for the good of all. The more we co-create with unity consciousness, the more love, peace, and harmony will prevail.

(For Part II, see CW-S2a)

• **Ed McGaa, JD, "Eagle Man": "When the Mississippi Ran Blue: Part I"** (Lecture: 1 hr)

Native Americans, prior to European domination, were successful environmentalists, not only in agronomy and harvesting, minimal pollution values, population control, and minimal resource waste, but also in discovering and promoting democracy — long before the Europeans. Their value system reached deeply into their spirituality as well. They lived their respect for their gifted surroundings, and held that the Creator's Nature bore no superstition and hence was earth-based rather than man-influenced. This, in turn, promoted a far more ethical and moral existence, despite the countless vilifying attempts of European and later American writers and historians. Modern advancement still needs to learn from them in order to become environmentally successful. (For Part II, please see CW-S2c)

Dr. Long presents his current groundbreaking investigation of the content of NDEs that address humankind's "Big Questions": Does God exist? Is there an afterlife? What is the meaning and purpose of earthly life? Remarkably, NDEs offer extraordinarily consistent information that does not seem explainable by pre-existing cultural or religious beliefs.

Page

- **Christine Page, MD: "Embracing Mystery: The Creative Ocean of Unlimited Possibilities"** (Lecture: 1 hr)

Amid all the information flooding our consciousness every moment of the day, there exists mystery. Revered by spiritual initiates for millennia, nature abounds with its mystical beauty radiating from a magical sunset and beautiful rainbow. The masculine, logical mind is puzzled by such feminine mystery but the heart rejoices, for when we fearlessly embrace the undefinable and have the courage to step into the unknown, we enter the loving ocean of limitless possibility and come alive. Intuition is the voice of mystery; its language includes symbols, images, dreams, and synchronicity. To hear the voice of our soul, we must quiet our chattering minds, release the need to have all the answers before moving, and allow ourselves to be embraced in the mists of love, magic, and creativity.

Mahr

- **Ted Mahr: "Humanity's Bright and Beautiful Future"** (Lecture: 1 hr)

With messages from President John F. Kennedy, Professor Albert Einstein, Senator Robert F. Kennedy, Dr. Masaru Emoto, Michel de Nostradamus, Robert J. Moderator: **M. Swaine**, PhD

Kumara

- **Kenji Kumara, MA: "Journey into the Quantum"** (Lecture: 1 hr)

We are being called to release all that which has bound us to limitation, and come into the full power and glory of who and what we are as divine beings having an earth experience in a human body. Moving from limited structured thought and movement into the unknown, takes great courage, strength, and stamina. We are being called to move into the state of trust and faith, and into the realms of the Quantum, so that we can begin to create a new life, a new reality, and a new world we call the New Earth.

Bachrach

- **Judy Bachrach: "What Doctors & Neurobiologists Know That We Should"** (Lecture: 1 hr)

Established physicians and scientists are engaged in new "post-materialist" research. Much of this relies on quantum physics, and the acceptance that invisible thoughts can change matter. Dr. Mario Beauregard says flatly, "Quantum physics has shown the world is not composed simply of solid material particles. We speak more in terms of virtual existence." And he is especially vehement on the subject of the human brain, whose functioning can be modified by, for instance, meditation. (Follow-up workshop: CW-S1b)

Chow

- **Effie Chow, PhD: "The Quantum Leap of Chow Qigong"** (Lecture: 1 hr)

Discover how collective consciousness can resolve body, mind, and spirit challenges; world and local violence; bullying in schools and elsewhere; and destructive climate change. You can bring health, wealth, and peace to the world, right now, by being part of a "life-giving" corps that believes in the power of love, compassion, humour, honour, touch, trust, faith, and PMAA to change anything. (Follow-up All-Day Workshop: CW-S7)

Martel

- **Anadi Martel: "The Power of Light"** (Lecture: 1 hr)

In the "subjective domain" of light, light can be used to induce higher cognitive perceptions (linked to emotions, integration, and healing) through objective means — a fertile ground with deep psychotherapeutic potential. This is where light's inherent transcendent qualities shine brightest, providing us with a remarkable way of connecting with consciousness.

Moody

- **Raymond Moody, MD, PhD: "Swan Songs"** (1 hr)

During their final days and hours of life, people frequently speak an enigmatic form of language that leaves survivors both mystified and inspired. They may use curious metaphors that suggest travel, recite poetry, or even sing. Dr. Moody presents cases of this fascinating phenomenon and discusses its relevance to the mystery of life after death.

Toso

- **Emiliano Toso, PhD: "Music and Biology to Support the Creation of a New Life in the Quantum Field"** (Lecture: 1 hr)

Just as each of our cells has been differentiated to perform a particular function in our bodies, each of us has been created to express a special love frequency of Unity in accordance with cosmic conception. In this presentation, experience and understand "Translational Music" — the soundtrack to this universal path. (Follow-up workshop: CW-S6a)

Motshekga

Fadel Behman, PhD: Living in the Cosmic Heart of Oneness (Plenary Session: 1½ hrs)

In the era of Classical Physics, space was looked at as empty — a quantum vacuum. Now Quantum Physics says that space is full of energy — a quantum plenum. Another gift from quantum physics is the influence of the observer on that which is being observed — a connection between subjectivity and objectivity. At the ultimate level, the universe is a single homogeneous sacred structure, beyond space and time, that cannot be proven by science. Closer collaboration between modern science and the spiritual introspective and contemplative traditions could prove beneficial to the understanding of the wholeness of life, and the harmony between the new humanity and the global environment.

Matas

a*) **Barbara Mainguy**, MA, & **Lewis Mehl-Madrona**, MD, PhD: **“Spirituality & the Brain”** (3 hrs)

How do our deeply held beliefs reshape our bodies? In this journey, we will review research on how religious faith reshapes the brain itself, and Hameroff and Penrose’s theory of conscious existence in this reality, which provides a scientific, brain science basis for reincarnation, astral travel, existence of multiple versions of ourselves in multiple realities, and explains some phenomena of dementia and psychosis.

b*) **Bishop Kevin Daniels**, DMin: **“A Charismatic Leap into the Quantum Field: Exploring Scientific & Spiritual Dimensional New Life Possibilities”** (Workshop: 3 hrs)

Bishop Daniels continues his exploration of the theological, spiritual, and scientific possibilities for New life. (See C2-S1b)

c*) **Manuel Matas**, MD: **“The Psycho-Spirituality of Everyday Life”** (Workshop: 3 hrs)

Explore the pervasiveness of spirituality in everyday life through an examination of popular culture, as it is expressed in music, movies, television, books, magazines, theatre, and sports. We are constantly bombarded by spiritual messages and images which pass right over us and through us, unless we pay attention to the pervasive subliminal spirituality surrounding us. By focussing on spirituality rather than pathology, we can elevate our thoughts, lift our moods, and connect with unity consciousness. The end result is that we will be able to say: “I’m awake. I’m aware. I’m alive.”

Steel

c*) Rosemary Steel: "Recognition of the Developing Unity of Consciousness" (4 hrs)

Unity of consciousness depends on the criteria that each individual places on thinking about anything inside or outside of their existing sphere. How that takes place and examples of how we as a race are evolving into that wider unity are many. The evolution of consciousness is frequently triggered by a trauma either within the family, the local society, or the world, when people are forced into seeing the wider situation. It is in this recognition that consciousness moves forward.
