

Richti Wallisellen, Zürich

Louis Meny

46

Richti Wallisellen is one of the areas developed in Zürich. The project consists of 6 buildings, organized in 5 blocks, in which 5 are “open” in the center. This open space is a common space for the users and offers a green area.

In the middle of the area, there is the only public open space, a mineral square.

One of the buildings is more higher than the other one and can be used like a landmark.

The project consists of some different programs like office, commercial at the ground floor and housing, and try to create a mixité of users.
