GENERAL INFORMATION

ORIENTAL MINDORO FACTS AND FIGURES 2021

2 CONGRESSIONAL DISTRICTS

1 COMPONENT CITY

14 MUNICIPALITIES

426 BARANGAYS

LAND AREA

Oriental Mindoro has a total land area of 4,364.72 square kilometers or 436,472 hectares. It represents 1.5% of the total land area of the country and 16% of the MIMAROPA Region.

LOCATION

Oriental Mindoro is located in MIMAROPA Region. It lies 45 kilometers south of Batangas and 130 kilometers south of Manila.

TOPOGRAPHY

Oriental Mindoro has a rugged terrain and an irregular coastline. Numerous rivers and streams traverse the province but none are navigable by large vessels.

BOUNDARY

It is bounded by Verde Island Passage on the North; Maestro del Campo Island and Tablas Strait on the East; Semirara Island on the South; and Occidental Mindoro on the West.

ORIENTAL MINDORO

CLIMATE

The province has two climate types: Type I and Type III. Type I is characterized by two pronounced seasons, dry and wet. Type III has no pronounced season, relatively dry from November to April and wet during the rest of the year.

A **MINERAL RESOURCE** is a concentration or occurrence of material of intrinsic economic interest in or on the earth's crust in such form, quality and quantity that there are reasonable prospects for eventual economic extraction.

from **2020 to 2021**, the volume of Non-metallic Minerals increased by **33.40%**

NON-METALLIC MINERAL PRODUCTS are a special group of chemical elements from which no new product can be generated if they are melted. Example of nonmetallic minerals are sand, gravel, limestone, clay and marble.

FOREST COVER

Forest Cover of MIMAROPA by Province: 2015
(Area in Hectares)

PROVINCE	CLOSED FOREST	OPEN FOREST	MANGROVE	TOTAL FOREST
Marinduque	-	10,893.00	3,012.00	13,904.00
Occidental Mindoro	8,937.00	107,677.00	1,838.00	118,451.00
Oriental Mindoro	5,906.00	88,233.00	3,088.00	97,227.00
Palawan	91,541.00	543,496.00	59,421.00	694,459.00
Romblon	3,777.00	18,918.00	1,058.00	23,753.00
MIMAROPA	110,161.00	769,217.00	68,416.00	947,794.00

Source: Philippine Forestry Statistics, 2020

Forests can be **'CLOSED'** or **'OPEN'** depending on the amount of cover provided by the tree canopy over the forest floor. An example of a closed forest is a rainforest, where branches and foliage of trees meet. Woodlands have a more open canopy with trees spaced farther apart.

Area Covered by Naujan Lake National Park

Municipality	Covered Barangays	Area	No Take Area (hectares)	Protected Area Percentage
Naujan	Montelago, Bayani, Laguna, Dao, and San Pedro	8,125.00	16.00	0.20
Victoria	Merit, Bambanin, Duongan, Malabo, Urdaneta, San Narciso, Pakyas, Leido, and Canaan		26.90	0.33
Socorro	Pasi I, Pasi II, Happy Valley, Batong Dalig, Lapog, Mabuhay I, Mabuhay II, and Subaan		No declared fish sanctuary yet/ in process	
Pola	Matula-tula and Tagbakin			
TOTAL			42.90	0.53

Source: Provincial Agriculture Office, 2021

NAUJAN LAKE is the fifth largest lake in the Philippines. The 8,129 sq. km. fresh water lake has been declared as a National park by the Department of Environment and Natural Resources and a Wetland of International Importance by the RamSar Convention.

Major Watersheds, Oriental Mindoro

Note:
 *Classification - for updating
 Class A - Public Water Supply Class II. For sources of water supply that will require complete treatment (coagulation, sedimentation, filtration and disinfection) in order to meet the NSDW.
 Class C - 1) Fishery Water for the propagation and growth of fish and other aquatic resources; 2) Recreational Water Class II (Boatings, etc.); 3) Industrial Water Supply Class I (For manufacturing processes after treatment).
 Class D - 1) For agriculture, irrigation, livestock watering, etc.; 2) Industrial Water Supply Class II (e.g. cooling, etc.); 3) Other inland waters, by their quality, belong to this classification.

COASTAL RESOURCES

Major Species Commonly Caught

Tanigue, tambakol, malasugi, mamsa, lapu-lapu, galunggong, tuna, herrings, hasa-hasa, kalapato, caranx, dalagang-bukid, alumahan, bisugo, samaral, anchovies, sardines

Minor Species other than Fish

Squid, shrimp, prawn, octopus, mudcrab, shells, lobster, cuttlefish, mussel, oyster, blue crabs, seaweed and sea cucumber

MARINE PROTECTED AREAS (MPA) are protected areas of seas, oceans, estuaries or large lakes. MPAs restrict human activity for a conservation purpose, typically to protect natural or cultural resources.

Note: Projected population computed using geometric formula. Figures do not add up to totals

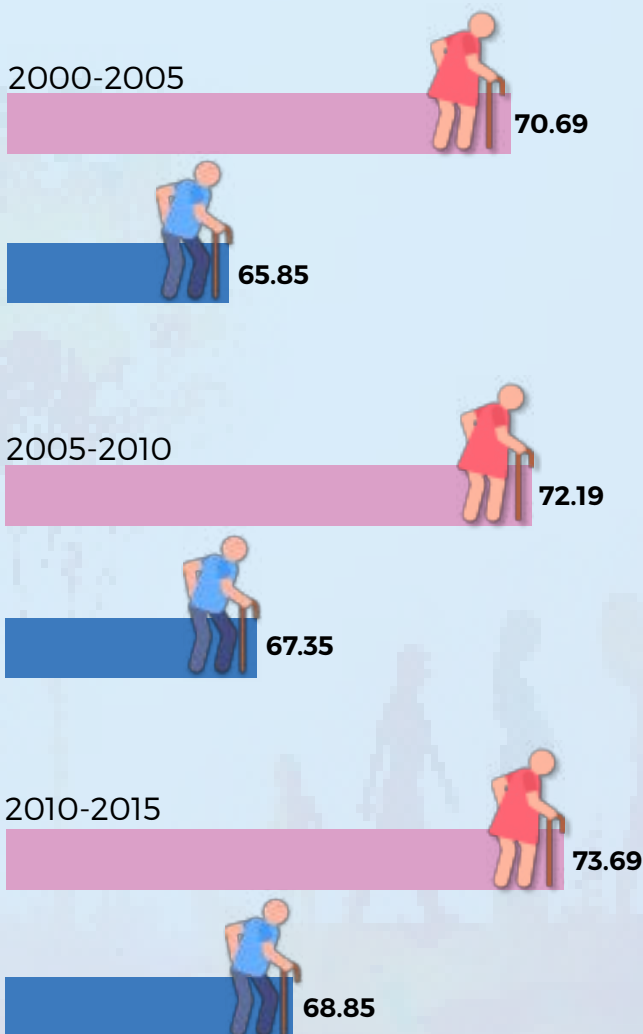

Urban Population Density is the ratio of urban population to the total area of urban barangays.

Number of Barangays, Number of Urban Barangays, and Percentage of Urban Barangays, by Province, and Highly Urbanized City in MIMAROPA

PROVINCE	Total Number of Barangays		Total Number of Urban Barangays		% of Urban Barangays	
	2010	2015	2010	2015	2010	2015
Marinduque	218	218	2	6	0.9	2.8
Occidental Mindoro	162	163	32	37	19.8	22.7
Oriental Mindoro	426	426	21	49	4.9	11.5
Palawan	367	367	33	52	9.0	14.2
Puerto Princesa City	66	66	19	27	28.8	40.9
Romblon	219	219	1	5	0.5	2.3
MIMAROPA	1,458	1,459	108	176	7.4	12.1

Life Expectancy at Birth

LIFE EXPECTANCY AT BIRTH - reflects the overall mortality level of a population. It summarizes the mortality pattern that prevails across all age groups - children and adolescents, adults and the elderly. It is the average number of years that a newborn is expected to live if current mortality rates continue to apply.

7

Tribes of **MANGYAN**

ALANGAN

The name Alangan was derived from the name of a river and mountain slopes in the upper Alangan Valley [Leykamm, 1979].

The women traditionally wear a skirt called *linge*. This is made of long strips of woven *nito* (forest vines), and is wound around the abdomen. This is worn together with the g-string called *abayen*. The upper covering is called *ulango*, made from the leaf of the wild *buri* palm. Sometimes a red kerchief called *limbutong* is worn over the *ulango*. The men wear g-strings with fringes in front.

The Alangan Mangyans practice *swidden* farming, which consists of eleven stages. Two of them are the firebreak-making (*agait*) and the fallowing (*agpagamas*). A firebreak is made so the fire will not go beyond the *swidden* site where the vegetation is thoroughly dry and ready for burning. Two years after clearing, cultivation of the *swidden* is normally ceased and the site is allowed to revert back to forest [Quiaoit, 1997].

Betel nut chewing is also noted among the Alangans, like all other Mangyan tribes. This they chew with great fervor from morning to night, saying that they don't feel hunger as long as they chew betel nut [Leykamm, 1979]. Nonetheless, betel chewing has a social dimension. Exchange of betel chew ingredients signifies social acceptance.

BANGON

The Bangon Mangyans live along the Bongabon river called Binagaw and the surrounding mountains in the municipalities of Bongabong, Bansud, and Gloria in Oriental Mindoro.

The Bangon Mangyans have their own culture, language and writing system, different to the other tribes in Oriental Mindoro, and asserted they be considered the seventh major tribe - not a sub-tribe of the Tau-buid. In a March 28, 1996 meeting with Buhid Mangyans in Ogom Liguma, they decided to accept the word Bangon for their tribe.

BUHID

The Buhids are known as pot makers. Other Mangyan tribes, like the Alangan and Hanunuo, used to buy their cooking pots from the Buhids. The word Buhid literally means "mountain dwellers" [Postma, 1967].

Buhid women wear woven black and white brassieres called *linagmon* and a black and white skirt called *abol*. Unmarried women wear body ornaments such as a braided *nito* belt (*lufas*), blue thread earrings, beaded headband (*sangbaw*), beaded bracelet (*uksong*), and beaded long necklace (*siwayang* or *ugot*). The men wear g-strings. To enhance body beauty, the men wear ornaments like a long beaded necklace, tight choker (*ugot*) and beaded bracelet (*uksong*). Both sexes use an accessory bag called *bay-ong* for personal things like comb and knife [Litis, 1989].

Together with the Hanunuo, the Buhids in some areas possess a pre-Spanish syllabic writing system.

The Buhid Mangyans live in the municipalities of Roxas, Bansud, Bongabong and some parts of Mansalay in Oriental Mindoro, and in the municipalities of San Jose and Rizal in Occidental Mindoro.

HANUNUO

To the Hanunuo, clothing (rutay) is one of the most important criteria in distinguishing the Mangyan from the non-Mangyan (damuong). A Hanunuo-Mangyan male wears a loin cloth (bag) and a shirt (balukas). A female wears an indigo-dyed short skirt (ramit) and a blouse (lambung). Many of the traditional style shirts and blouses are embroidered on the back with a design called pakudos, based on the cross shape.

Together with their northern neighbor the Buhids, the Hanunuo possesses a pre-Spanish writing system, considered to be of Indic origin, with characters expressing the open syllables of the language [Postma, 1981]. This syllabic writing system, called Surat Mangyan, is being taught in several Mangyan schools in Mansalay and Bulalacao.

IRAYA

The Iraya Mangyans live in the municipalities of Puerto Galera, San Teodoro and Baco in Oriental Mindoro but most are in Occidental Mindoro, particularly in the municipalities of Abra de Ilog, Paluan, Mamburao and Santa Cruz.

Estel (1952) described the Iraya as having curly or deep wavy hair and dark skin but not as dark as that of the Negrito.

During ancient times, the Iraya traditional attire was made of dry tree bark, pounded to make it flat and soft. The women usually wore a blouse and a skirt and the men wore g-strings made of cloth. Today, however, the Iraya are dressed just like the lowland people. Ready-to-wear clothes are easier to find than their traditional costume [Uyan, 2002].

The Irayas are also skilled in nito-weaving. Handicrafts such as jars, trays, plates and cups of different sizes and design are being marketed to the lowlanders. They subsist on rice, banana, sweet potato, and other root crops.

TADYAWAN

The Tadyawan Mangyans live in the municipalities of Naujan, Victoria, Socorro, Pola, Gloria, Pinamalayan, and Bansud.

In the past, the women wore for their upper covering a red cloth called paypay, which is wound around the breast. For their lower covering, they wrapped around the waist a white cloth called talapi. The men wore g-strings called abay. For their accessories, women wore colorful bracelets and necklaces made of beads. Today, the women are rarely seen wearing their traditional attire, though some men still wear the abay.

Like all other Mangyan tribes, the Tadyawan depend on their "kaingin" farm for subsistence. Their staple foods are upland rice, banana, sweet potato, and taro. Some have also planted fruit-bearing trees like rambutan, citrus, and coffee in their kaingin.

TAU-BUHID

The Tau-buhids are known as pipe smokers and even children begin smoking at a young age.

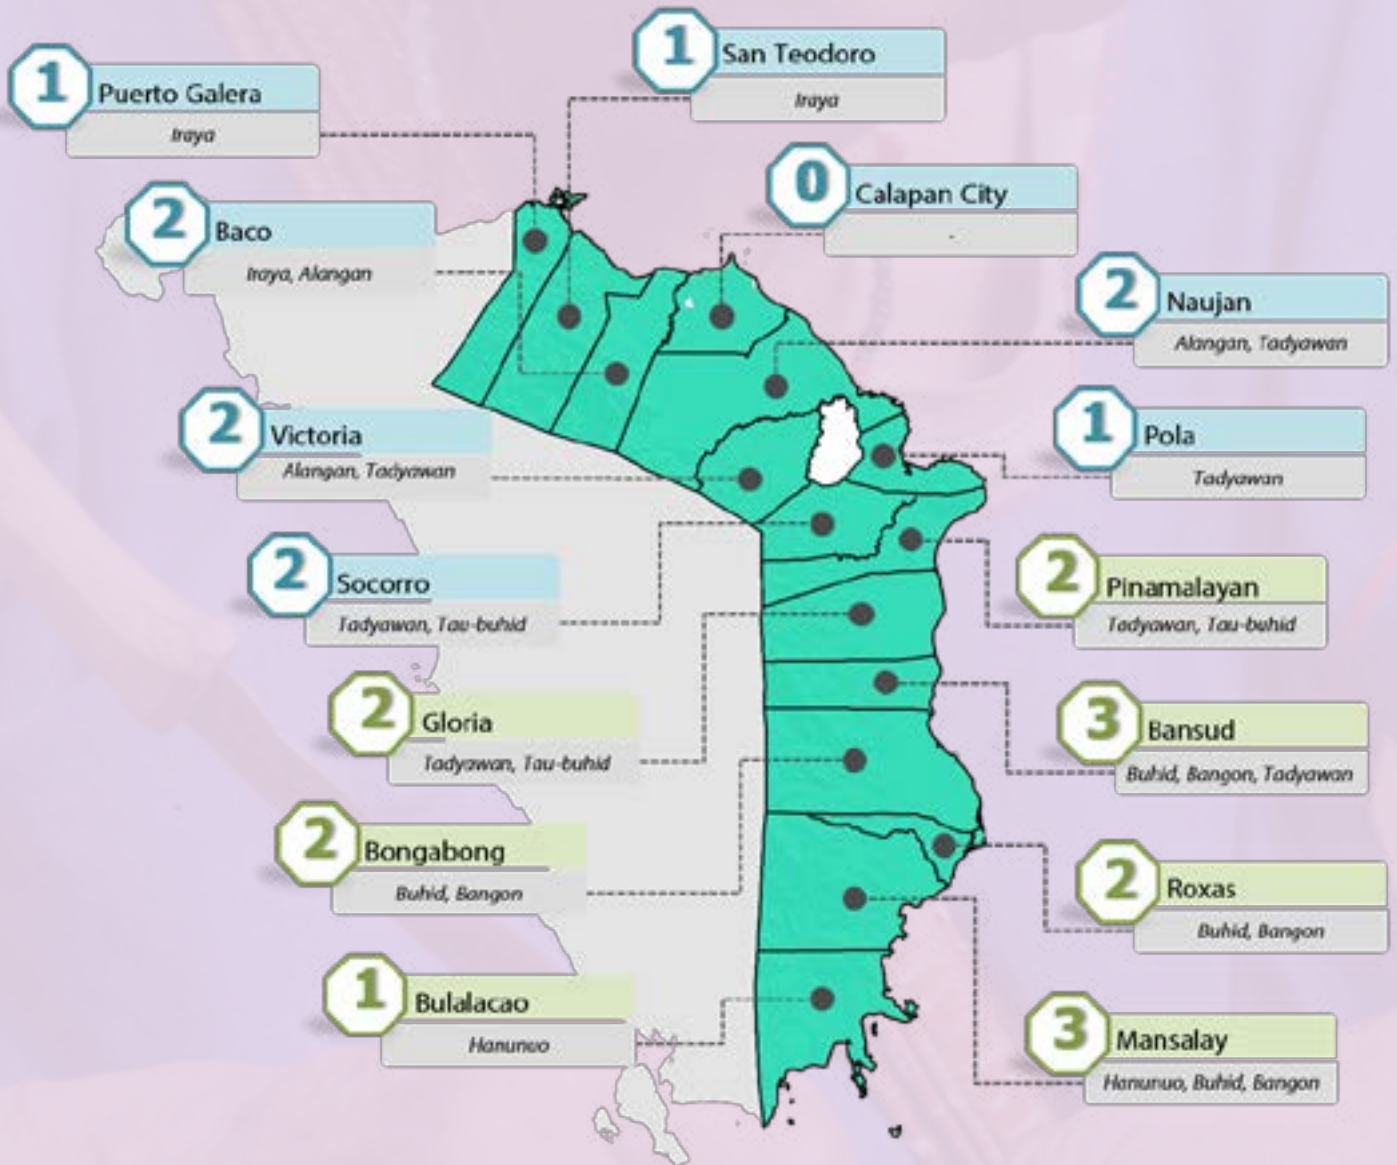

Standard dress for men and women is the loin cloth. In some areas close to the lowlands, women wrap a knee-length cloth around their bark bra-string and men wear cloth instead of bark. Bark cloth is worn by both men and women in the interior and is also used for head bands, women's breast covers, and blankets. Cloth is made by extracting, pounding and drying the inner bark of several trees [Pennoyer, 1979].

The Tau-buhid Mangyans live in the municipalities of Socorro, Pinamalayan and Gloria, but mostly are in Occidental Mindoro.

COVID-19 is a disease caused by a new strain of coronavirus. 'CO' stands for corona, 'VI' for virus, and 'D' for disease. Formerly, this disease was referred to as '2019 novel coronavirus' or '2019-nCoV'. The COVID-19 virus is a new virus linked to the same family of viruses as Severe Acute Respiratory Syndrome (SARS) and some types of common cold.

IRRIGATION is the method in which a controlled amount of water is supplied to plants at regular intervals for agriculture.

The term **RAINFED** agriculture is used to describe farming practices that rely on rainfall for water.

EFFECTIVE RICE AREA is the total rice area planted during Wet Season and Dry Season.

Irrigated Area by Type of Irrigation Facility by City/Municipality

PANDANG GITAB

The Festival of Lights

EVERY 3RD SATURDAY OF FEBRUARY

Its name was coined from Pandango sa Ilaw (Fandango), a popular dance that originated from Oriental Mindoro and had its dancers balancing oil lamps called tinghoy or candles in glasses on their heads and on the back of each extended hand, and from Dagitab, a local word which means 'light.'

The Pandango sa Ilaw was believed to have been inspired by the practice of sending off fishermen going out to sea in the wee hours of the morning by their families, who brought lamps to guide their way through the darkness.
