

Location: Ruta 8 KM 69.600, Departamento de Canelones, Uruguay
Power: 10 MW
Vendor: Vestas
Turbines: V100 HH95 2 MW
Number of Turbines: 5
Voltage: 30 kV

Legal Structure: Trust
Structurer: Posadas & Vecino Negocios
Legal Counseling: Posadas & Vecino Negocios
Market Type: 100% Spot

Conceived: December 2014
Construction Start: May 2015
StartUp: June 2016

DESCRIPTION:

Solís de Mataojo Wind Park is composed of 5 Vestas V100 2 MW wind turbines, adding up a total of 10 MW nominal power.

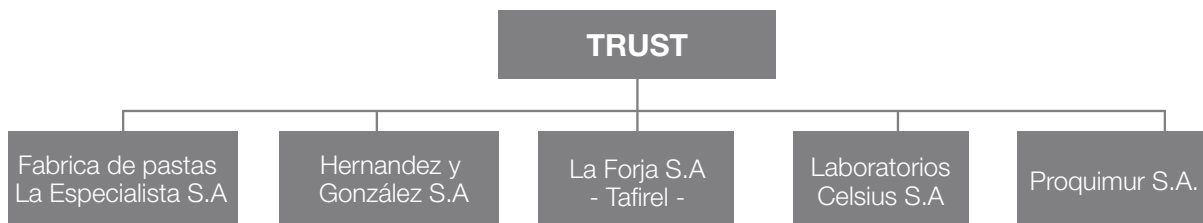

Solís de Mataojo is owned by 5 recognized companies in their field, listed in alphabetical order as follows: Fabrica de Pasta La Especialista S.A., Hernández y González S.A., La Forja S.A. - Tafirel -, Laboratorio Celsius S.A., and Proquimur S.A.

LEGAL STRUCTURE:

In order to exploit Solís de Mataojo Wind Park, a management trust was formed between the 5 companies aforementioned (settlers) and Posadas y Vecino Fiducaria (trustee). The legal structure ensures a smooth commercialization of the electric energy between the investors, the trustee and UTE.

The trustee leases the windpowered generators of each settlor in order to generate electric power and then sells that power to the Spot Market, using this income to pay for the leasing of the generators and land, maintenance of general equipment and any other operating expense, and afterwards divides up the dividends of its income with the 5 settlers.

LOCATION:

Solís de Matajo Wind Park is located on KM 69.600 of Ruta 8 in the Department of Canelones, Uruguay.
