Foreword

More than 15 years ago, Indonesia's largest oil discovery in decades was made in Banyu Urip Field. Community programs focusing on three pillars (education, community health, and local economic development), were implemented to improve the quality of life of the local community in Bojonegoro, Tuban, and Blora. Over 38,000 community members have benefitted from these programs, and the number will keep growing. We continue to implement these programs by maintaining strong collaboration with the community, NGOs, and local government. We strive to make it possible.

Dana Ardian
Maintenance Superintendent

Thanks to our strategic partnership with the Cepu Block partners, the government and most importantly the local communities, Banyu Urip has reached a production capacity of 185,000 barrels per day – over 20 percent of Indonesia's oil production target, and conducted a high-rate test of over 200,000 barrels per day to ensure a safe and reliable operations with no environmental impact.

We thank all parties continuous support for Banyu Urip that enable us to deliver Indonesia's growing energy needs.

Please enjoy reading our latest news.

The match news from Banyu Urip

EMCL is conducting high test rate safely with no impact to the environment. The test was required to increase production rate and fulfill Indonesia energy needs.

Robot competition

An International Robotic Training and Competition was held in Johor Baru Malaysia on 18-19 January 2017. With EMCL's support, the robotic team from SMA 1 Baureno, Bojonegoro, participated in the competition and won first place defeating contestants from 10 other countries. Their prototype robot for trash compiling and waste management received the biggest point from the jury for their unique concept. The same prototype robot contested in a similar competition in Singapore and won the third prize.

Inspirational program at Rumah Perubahan

February 13-16, 2017. 18 teachers and 18 members of the local youth organizations from 12 villages in Gayam sub-districts participated in a workshop with Rhenald Kasali -a renowned motivator, educator - at Rumah Perubahan in Bogor, West Java. As part of Exxonmobil's inspiration program, this workshop improves the quality of teachers' teaching method in the era of global technology advancement as well as to motivate the local youth to be a future agent of change and entrepreneur in their home village.

Local youth learning methods to be a future agent of change society and entrepreneur.

Teachers learning new educational methods.

Employment Awards

February 21, 2017, ExxonMobil Cepu Limited (EMCL) received the 2017 East Java Governor – Workforce Development Award. The award was presented for EMCL contribution in developing the communities' capacity to prepare them for employment through various community programs such as haircut training, bridal make up training, and processing training. Since 2014, the program has benefited more than 250 community members in Bojonegoro who are now capable of driving economic growth in their surrounding areas.

Biolarvasida training

January 17, 2017. Paratazka Foundation and health cadres from Gayam sub-district organizes a training session on how to produce biolarvicides at Brabowan village hall. Supported by EMCL, this training aimed to improve the cadres' ability in making their own biolarvicides, an insecticide used to eliminate mosquito larvae, and reducing the use of chemical larvicides.

Jumantik (Larvae Monitoring Team) cadres from four villages (Gayam, Mojodelik, Brabowan and Bonorejo), local village health workers, and Gayam community health centre participated in this training.

Cerdas Cermat Gayam

February 21, 2017. Yayasan Kampung Ilmu Bojonegoro (YKIB) organized a Trivia Quiz for 21 primary schools in Gayam sub-district. Final event was held on April 4, 2017, and SDN Brabowan won the final event.

With the champions. Winner: SDN Brabowan, runner-up: SDN Mojodelik II, third place: SDN Beged.

"Honorable mention 1: SDN Gayam I, honorable mention 2: SDN Katur I, honorable mention 3: SDN Sudu I."

Performance from Yayasan Kampung Ilmu Bojonegoro.

Photo rally

▲ **February 4, 2017.** EMCL together with Bojonegoro Community Information Network and Gayam Youth Organization conducted the 2017 Banyu Urip Workshop and Photography Competition. The series of events were started with a photography workshop held at Business Incubator Program building at Gayam sub district.

▲ Senior East Java Photographer, Mr. Yuyung Abdi from Jawa Pos media coached 50 participants on various photography topics.

▲ **February 12, 2017.** Following the workshop, a photography competition was then held with a theme: building the local community's autonomy, bringing 150 participants from Bojonegoro, Cepu, Tuban, Yogyakarta, Solo, Ngawi, Surabaya, and Lamongan in a melting pot. Lining up as jury was Yuyung Abdi, a senior photographer, SKK Migas representative and Indonesian Photography Community representative from East Java. All photos submitted by participants were displayed during a photography exhibition at the Bojonegoro Cultural and Tourism agency office from February 19-25, 2017.

▲ Results Banyu Urip Photo Contest 2017 exhibition was held at the Bojonegoro Cultural and Tourism agency office.

▲ The winners of the photography competition were announced during the Car Free Day event at Bojonegoro city square.

Greening program in three villages

February 8, 2017. A youth-based reforestation program was held at Bonorejo village hall and continued with a planting ceremony at the Bonorejo soccer field. 60 participants from Bonorejo, Mojodelik and Brabowan villages; the local youth organizations; the Bojonegoro Environmental Agency; the Bojonegoro parliament representative and Head of Gayam sub district attended the event. The program was held from December 2016 to March 2017, expected to plant a total of 4,500 trees, consisting of Gladag, Trembesi, Mango and Pomelo trees.

Village School

February 11-12, 2017. As part of the infrastructure program implementation, a workshop has been conducted for the implementor program team. Implementor team in a village is a team created and elected based on decree by head of the village to do development process. Training

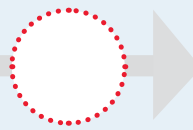

was conducted by program partner, IDFoS. Representatives from 10 villages (Gayam, Ringin Tunggal, Begadon, Brabowan, Pekuwon, Glodok, Cendoro, Pucang, Ngimbang, Karangagung) attended the event. Through this workshop, participants learned about good governance on village level, financial management, leadership and transparency to ensure village development programs implementation.

Program for infrastructure development and renovation

In early 2017 EMCL handed over six different types of infrastructure in 13 villages.

School renovation	Road upgrade	Public facility	Drainage
			
<p>SDLB Sumbang hall, and two kindergarten classrooms in Bonorejo village, Bojonegoro.</p>	<p>A total of 2,627 meter covering Jampet, Pungpungan, Ngujo, Wadang, Bareng, Jelu villages in Bojonegoro, and Jegulo village in Tuban.</p>	<p>Volley ball court at Jampet village and Cengungklung village hall fence, Bojonegoro.</p>	<p>A total of 477 meter at Mentoro village, Tuban, and Bonorejo village, Bojonegoro.</p>
